

UNOFFICIAL PLAYER STUDY SHEETS · ORIGINS CONSTRUCTED

Win Taiwan with Kai'Sa, Survivor

卡莎起源賽事手冊 · 牌面辨識、打法、對局與賽前裝備

Your Hellgate tower-defense files are gone. This is the working document for the 40-card Fury/Mind Kai'Sa list: original study cards for every name in the paste, the lines that actually close games, the Origins legends that steal rounds, and a packing list for the first Traditional Chinese events.

Legend: Kai'Sa, Daughter of the Void

Chosen Champion: Kai'Sa, Survivor

Domains: Fury / Mind

First TW Regional Qualifier: 19–20 Sep 2026

The 40-card registration list

四十張報名主卡組 · 含選擇英雄區的卡莎

Count check. The pasted list is 38 named copies. Constructed registration wants 40 in the main count that includes the Chosen Champion. This guide fills the two missing slots with extra *Falling Star* (the normal Origins Kai'Sa density). If you meant two other cards, swap those two copies — do not sit down with 38.

40

Main + chosen champion

I

Legend (not in the 40)

3

Battlefields

I2

Runes · 7 Fury / 5 Mind

One of the two **Kai'Sa, Survivor** copies starts in the Chosen Champion zone. The 40-card registration count includes it. You still need the legend, three battlefields, twelve runes, and (for Swiss after game one) a sideboard.

Qty	Code	Card	繁中	Role
2	OGN-039	Kai'Sa, Survivor	卡莎，倖存者	Chosen + recast body. Accelerate, conquer draw.
1	OGN-010	Legion Rearguard	軍團後衛	Cheap Accelerate opener.

Qty	Code	Card	繁中	Role
1	OGN-013	Pouty Poro	呾呾普羅	Deflect bait. Tax their removal.
3	OGN-103	Ravenbloom Student	拉文布魯姆學生	Best two-drop. Grows with every spell.
3	OGN-096	Watchful Sentry	警覺哨兵	Deathknell draw. Holds a lane while you spell.
3	OGN-087	Lecturing Yordle	約德爾教官	Tank + immediate draw.
3	OGN-012	Noxus Hopeful	諾克薩斯新兵	Legion 4-might for 2.
3	OGN-027	Darius, Trifarian	達瑞斯，三鐵衛	Second-card pump. Ready 7-might closer.
3	OGN-116	Thousand-Tailed Watcher	千尾監視者	Board shrink + 7-might conquer.
3	OGN-004	Cleave	順劈	Assault +3 on the attack.
3	OGN-009	Hextech Ray	海克斯射線	Action 3 damage on a battlefield unit.
3	OGN-104	Retreat	擇日再戰	Save a body, channel an exhausted rune.
3	OGN-095	Stupefy	震懾	Reaction -1 and draw.
3	OGN-029	Falling Star	星落	Two 3-damage hits. Hits base or battlefield.
1	OGN-093	Smoke Screen	煙幕	Reaction -4. Blowout vs 5-7 might.
1	OGN-248	Icathian Rain	艾卡西亞暴雨	Signature wipe. Six 2-damage hits.

Qty	Code	Card	繁中	Role
1	OGN-122	Time Warp	時間扭曲	Extra turn. Banishes. Win at 6–7 points.

Legend (required)

1 × **Kai'Sa, Daughter of the Void** · OGN-247 · 卡莎，虛空之女
Reaction: exhaust to add 1 Power that can only pay for a spell, any domain. This is why the list is spell-dense. Count this extra power before every showdown.

Battlefields

- **Void Gate** 虛空之門 — spell damage +1. Your home lane.
 - **The Dreaming Tree** 幻夢之樹 — spell a friendly unit, draw.
 - **Zaun Warrens** 祖安地道 — discard-draw to find Watcher / Warp.
- Swap in Reaver's Row if Survivor keeps dying in combat.

Runes

- 7 × Fury Rune 熾烈符文
- 5 × Mind Rune 靈光符文

Power is paid by recycling a matching rune. Accelerate and Time Warp are the expensive power sinks. Do not recycle yourself off the next turn unless the point is the game.

What they look like

牌面辨識卡 · 原繪練習用，不是官方卡圖

These are unofficial study sheets: original illustrations plus the rules text you need at the table. Official Origins cards are copyright Riot Games / GLORIOUS SOUL. Use these to drill names, costs, and effects; sleeve the real cards for the event.

L

Kai'Sa, Daughter of the Void
卡莎，虛空之女

OGN-247 · LEGEND · FURY / MIND

Reaction — Exhaust: add 1 Power that may only be spent to play a spell, of any domain. Activate even on their turn. This is the engine: one extra spell pip every time it is ready.

×1 legend · not in the 40

4

4

Kai'Sa, Survivor
卡莎，倖存者

OGN-039 · CHAMPION UNIT · FURY · EPIC

Accelerate — you may pay 1 Energy and 1 Fury Power as an additional cost to have her enter ready. When she conquers, draw 1. One copy starts in the Chosen Champion zone. Recast her after Retreat or a hold; do not idle her in base if a battlefield is empty.

×2 · 1 chosen, 1 in deck

2

2

Legion Rearguard
軍團後衛

OGN-010 · UNIT · FURY · COMMON · TRIFARIAN, NOXUS

Accelerate — pay 1 Energy and 1 Fury Power extra to enter ready. Turn-one or turn-two pressure when you need a body in a lane now. Fine to chump or Cleave.

×1

2

2

Pouty Poro

呲呲普羅

OGN-013 · UNIT · FURY · COMMON

Deflect — opponents must pay extra Power to choose this with a spell or ability. Park it on a battlefield they want to ping. Back it with Cleave or Stupefy rather than spending your own targeted spells into it.

×1

2

2

Ravenbloom Student

拉文布魯姆學生

OGN-103 · UNIT · MIND · UNCOMMON

When you play a spell, give this +1 Might this turn. Keep Energy back on their turn so a Hextech Ray or Stupefy turns a 2-might body into a winning showdown. Premier keep in the opener.

×3

2

1

Watchful Sentry

警覺哨兵

OGN-096 · UNIT · MIND · COMMON

Deathknell — draw 1 when this dies. It is a 1-might placeholder that refunds a card. Use it to occupy a lane, soak, or force them to spend a spell and still give you the draw.

×3

3

2

Lecturing Yordle

約德爾教官

OGN-087 · UNIT · MIND · COMMON

Tank — combat damage is assigned to this first. When you play it, draw 1. The body is small; the card and the Tank tag are why it is a three-of. Cleave it when you must steal a lane.

×3

4

4

Noxus Hopeful

諾克薩斯新兵

OGN-012 · UNIT · FURY · COMMON · NOXUS, TRIFARIAN

Legion — this costs 2 less if you have already played another card this turn. Sequence: 1-cost spell, then Hopeful for 2 Energy as a 4-might threat. Same trigger window as Darius.

×3

5

5

Darius, Trifarian

達瑞斯，三鐵衛

OGN-027 · CHAMPION UNIT · FURY · RARE

When you play your second card in a turn, give Darius +2 Might this turn and ready him. He enters exhausted unless that trigger hits. Pattern: Hextech Ray or Cleave, then Darius, conquer at 7. The +2 drops at end of turn; replay two cards on their turn if you need the pump on defense.

×3

7

7

Thousand-Tailed Watcher 千尾監視者

OGN-116 · UNIT · MIND · RARE · IONIA

Accelerate — 1 Energy and 1 Mind Power extra to enter ready. When you play this, enemy units get -3 Might this turn (minimum 1). The shrink lasts the rest of the turn, so a second attacker can take the other battlefield. This is the cleanest two-point turn in the list.

×3

1

A

Cleave 順劈

OGN-004 · SPELL · FURY · COMMON · ACTION

Play on your turn or in showdowns. Give a unit **Assault 3** this turn (+3 Might while it is attacking). Turns Student, Poro, or Yordle into a real conquer. Also the cheapest way to trigger Legion / Darius.

×3

1

A

Hextech Ray 海克斯射線

OGN-009 · SPELL · FURY · COMMON · ACTION

Play on your turn or in showdowns. Deal 3 damage to a unit *at a battlefield*. Cannot snipe a unit sitting in base. Pay Fury Power; Kai'Sa's legend covers one Power. This is the default answer to 3-might openers.

×3

1

R

Retreat 擇日再戰

OGN-104 · SPELL · MIND · UNCOMMON · REACTION

Play any time, even before spells and abilities resolve. Return a friendly unit to its owner's hand. That owner channels 1 rune exhausted. Save Survivor from a losing showdown, jump a rune toward Watcher, and recast with Accelerate next turn.

×3

1

R

Stupefy 震懾

OGN-095 · SPELL · MIND · COMMON · REACTION

Play any time. Give a unit -1 Might this turn, to a minimum of 1. Draw 1. Cantrip combat trick. Tie a showdown, shrink a 4-might blocker, or Stupefy your own unit at Dreaming Tree to draw two.

×3

2

S

Falling Star 星落

OGN-029 · SPELL · FURY · RARE

Current errata: Deal 3 to a unit. Deal 3 to a unit. Split or stack (6 to one body). Hits units in base or at a battlefield. This is the answer to Deflect-light 6-might threats and to double 3-drops. Two extra copies complete the 40.

×3 · 2 added to reach 40

2

R

Smoke Screen

煙幕

OGN-093 · SPELL · MIND · COMMON · REACTION

Give a unit -4 Might this turn, minimum 1. Hide this for Master Yi bodies, Sett, and enemy Darius. Do not spend it on a 3-might unit Hextech Ray already kills.

×1

7

S

Icathian Rain

艾卡西亞暴雨

OGN-248 · SPELL · FURY / MIND · EPIC

Errata: Deal 2 to a unit, six times. Split across the board or stack 12 onto one threat. Signature spell. Dual-domain Power. Wait until it actually resets the score, not when you are merely annoyed.

×1

10

S

Time Warp

時間扭曲

OGN-122 · SPELL · MIND · EPIC

Take a turn after this one. Banish this. Typical cost: 10 Energy and 4 Mind Power. Winning lines: holding two fields at 6 points, or conquering to 7 then Warping into a Hold for 8. Calm-domain Wind Wall / deny spells beat this — ask before you tap out.

×1

B

1

The Dreaming Tree

幻夢之樹

BATTLEFIELD

Value lane. Move a unit here, then target it with Stupefy, Cleave, or Retreat to draw. Do not donate this battlefield to a grind deck if you can help it.

×1 battlefield

B

1

Void Gate

虛空之門

BATTLEFIELD

Your preferred combat lane. Boosts spell damage, so Hextech Ray and Falling Star start deleting real units. Contest this early against other spell decks.

×1 battlefield

B

1

Zaun Warrens

祖安地道

BATTLEFIELD

Loot filter. Discard a spent 1-cost to find Watcher, Rain, or Warp. Fine to give up if the other two lanes score; do not die holding a loot field while they take both scoring lanes.

×1 battlefield

How this deck wins

Kai'Sa is not a linear aggro deck and it is not a tap-out control deck. It is a **spell-tempo** deck: cheap Action and Reaction spells keep battlefields empty or skinny, small units convert those empty lanes into points, and then Darius, Watcher, or Time Warp ends the game before the opponent rebuilds.

Score to 8. You **Hold** during your beginning phase if you already control a battlefield, and you **Conquer** when you take one you have not scored this turn. The final point has extra rules: a Hold can win, but a Conquer for the last point only counts if you have scored every battlefield this turn. If you Conquer for point 8 without having scored the other field, you draw a card instead of winning. Learn that rule cold before Taiwan. Time Warp exists to turn a 6- or 7-point board into a Hold win they never get to answer.

Legend first

Exhaust Kai'Sa, Daughter of the Void whenever you would otherwise recycle a rune to pay a spell's Power. That is almost every Hextech Ray, Falling Star, and Icathian Rain. If you forget the legend, you deramp and the deck feels clunky. If you remember it, you cast a spell most turns and still channel runes for tomorrow.

Turn shape

1. **Opener.** Keep Ravenbloom Student, Hextech Ray, Lecturing Yordle, or Retreat. A 2-drop plus a 1-cost spell is the real keep. Ship Time Warp back unless you already know they are a ramp deck.
2. **Lanes, not hero-trading.** Put a small unit on an empty battlefield and score. Do not pick a 4-vs-4 fight without a spell in reserve.
3. **Survivor loop.** Play Kai'Sa, Survivor Accelerated when a lane is winnable. Conquer, draw. If they threaten the Hold, Retreat her, channel a rune, recast later. One Survivor doing this twice is more points than slamming Darius into a ready blocker.
4. **Midgame Legion.** Spell, then Noxus Hopeful for 2. Or spell, then Darius to ready a 7-might attacker. Always count "is this my second card?" before you play the 5-drop.
5. **Close.** Accelerated Watcher shrinks their board and takes a field. Second attacker takes the other. Or Warp at 6 holding two, or at 7 holding one. Icathian Rain is for the turn their board is actually wider than your pings.

Energy discipline

Leave Energy up on their turn. This list is full of Action and Reaction cards that only matter in showdowns. Tapping out to deploy a 4-might unit into an open lane is often correct; tapping out when they have a ready attacker on your field is how Kai'Sa loses to Master Yi and Annie.

Mulligan

- Always: Student, Ray, Yordle, Retreat, a rune-friendly 2-drop.
- On the play vs unknown: keep one interaction and one unit. Do not keep Watcher + Warp + Rain.
- On the draw vs known aggro: Ray, Stupefy, Smoke Screen, Student.
- Vs known slow decks: you may keep Warp if the rest of the hand can live until 10 Energy.

Origins matchups to respect

起源環境要小心的對局

Taiwan's first month is Origins-legal product. The same legends that ran western and CN Origins events will show up at store-level Summoner Skirmish and at the September Regional Qualifier. Kai'Sa is a premier Origins legend. It still has losing and coin-flip pairings. Play those, do not ignore them.

Legend	繁中	Role	Plan
Master Yi	易大師	Worst regular pairing. Wuju tempo-defense out-sizes cheap pings and contests both lanes.	Do not empty both fields. Smoke Screen and Falling Star are for his mid-might attackers, not for their 2-drops. Watcher shrink is the clean swing. If they sit behind Tank units, Cleave a second attacker instead of Ray-ing into Tank. Never Time Warp into a board they will Hold-kill; Warp only when a Hold wins on the extra turn.
Viktor	維克特	Gear grind. Recycles value, clogs lanes with bodies your 3-damage spells do not finish.	Kill the gear plan early if you own Thermo Beam in the board. Otherwise punch points now. Do not play a long game of 1-for-1s. Hopeful and Accelerated Survivor force him off fields. Rain is actually good here if he swarms small units. Side in extra Falling Star / Smoke if you have them.
Annie	安妮	Explosive early. Can race you before Watcher comes online.	Keep Ray and Stupefy. Block her first conquer. Do not greed Dreaming Tree draws on turn two. A clunky opener vs Annie is a lost match. After you stabilize, you are favored — she runs out of gas, you do not.
Kai'Sa mirror	卡莎鏡像	Same tools. Sequencing and Survivor timing decide it.	Void Gate is the most important battlefield. Do not be the first to tap out of Reactions. Winner is whoever gets a ready Survivor conquer plus a card, then Retreats out of the swing-back. Hold Smoke Screen for their Darius or Watcher, not their Sentry.
Darius / Sett	達瑞斯 / 賽特	Fat midrange. Sett walls; enemy Darius uses your own Legion trick.	Falling Star stacked (6) or Smoke Screen -4. Do not Cleave into a bigger ready body. Watcher is excellent. You are generally favored if you do not donate free conquers on turn two.
Jinx, Lee Sin, Ahri,	吉茵珂絲、李	Origins data had them below the S-tier pair.	Play the main plan. Vs Jinx, respect wide boards and save Rain. Vs Lee Sin, do not walk Survivor into a

Legend	繁中	Role	Plan
Volibear	星、阿 璃、弗 力貝爾	Still capable of stealing games.	ready monk without a Reaction. Vs Ahri, they can score without a clean Hold — race. Vs Volibear, Warp is live if they spend the first four turns ramping.
Miss Fortune / Teemo	好運姐 / 提摩	Trick and tempo. Less common, high variance.	Do not overcommit into hidden combat tricks. Keep one Reaction. Take points when lanes are truly empty.

Store-level warning. First-month Taiwan events will still have a lot of precon Jinx / Viktor / Lee Sin and Proving Grounds Annie / Lux / Yi / Garen. Those are winnable if you play real constructed. The players who will knock you out of a Regional Qualifier are Yi, Viktor, Annie, the mirror, and anyone who knows the final-point rule better than you.

First Taiwan tournaments

第一次打台灣賽要帶什麼、先搞懂什麼

The calendar in front of you

7 Aug 2026 — Traditional Chinese Origins street date (GLORIOUS SOUL). You are two weeks into that.

Now → mid-Sep — store Summoner Skirmish events. This is where you learn the physical game, not just TTS.

19–20 Sep 2026 — first Traditional Chinese Regional Qualifier, 台北矽谷國際會議中心 B2, New Taipei. 512 players. Origins constructed.

9–11 Oct 2026 — Macau RQ at ASCC, Venetian Expo. Same size.

English and Traditional Chinese cards are mix-legal, same idea as other TCGs. Bring whichever printings you have. Judges in Taiwan will still expect you to know what your English cards do in Chinese if an opponent asks.

What to have in the bag

- ☐ Legal deck: legend + chosen champion + 40 + 3 battlefields + 12 runes

- ☐ Sideboard (up to the event cap, usually 8) in a marked section

- ☐ Identical opaque sleeves, no extras mixed in, no damaged faces

- ☐ Spare sleeves, deckbox, token dice for points and damage

- ☐ Playmat, life/score pad, pen, printed decklist

- ☐ Photo ID for the Regional Qualifier

■ Water, snack, power bank — 512-player days are long

■ This PDF or a one-page cheat sheet of Chinese names

Recommended sideboard for Origins stores

- 2 × Smoke Screen — Yi, Sett, enemy Darius, Watcher fights.
- 2 × extra interaction vs gear / artifacts if you own Thermo Beam (Viktor).
- 1–2 × Void Seeker — cantrip 4 damage at a battlefield; extra gas in the mirror.
- 1 × Time Warp — vs ramp and slow control.
- 1 × Mega-Mech or Sprite Mother — vs pure aggro when you need a ready body.
- 1 × Unchecked Power or extra Falling Star — vs Deflect and fat might.

You do not need a perfect 8 before your first Skirmish. You do need the 40 to be legal and sleeved.

Learn this before you sit down

賽前必練 · 規則比記錯卡還容易把你淘汰

Rules that decide matches

1. Hold vs Conquer, and the **final point** exception.
2. **Action** (your turn or showdowns) vs **Reaction** (almost any time, including before things resolve).
3. **Accelerate** is +1 Energy and +1 matching Power, optional, paid as you play the unit.
4. **Power** is recycling a rune, not exhausting it. Exhausting pays Energy. Kai'Sa's legend pays one spell Power without recycling.
5. **Legion, Deathknell, Tank, Deflect, Assault** — say them out loud in English and Chinese.
6. Showdown math: might vs might, leftover units, who is ready afterward.
7. You may only score each battlefield once per turn.
8. Marked cards, notes, and slow play are how otherwise good players get warnings.

Practice plan (do this, then register)

1. Goldfish ten opening hands. Write keep/mull.
2. Play the Darius line (1-cost then 5-drop) until it is automatic.
3. Play the Watcher Accelerate line and name which two fields you are taking.
4. Set a board at 6 and at 7 points and practice the Warp win plus the failed-Warp (deny) branch.
5. Play at least one real Skirmish or shop night. Physical sequencing is slower than you think.
6. Read the current Tournament Rules and the Falling Star / Icathian Rain errata. Judges will use the new text.
